

PANACEA | A Mobile Paramedic Notebook & Care Assistant

Powered By Brilliant Innovations

Today emergency medical personnel need PANACEA to ensure that they have the most up-to-date protocols and dosages at their fingertips when it counts. PANACEA is a mobile app that replaces paper memory aids, reduces opportunities for error by providing step by step instruction, and documents all actions taken. It ensures that the *right* medication is being delivered to the *right* person in the *right* dosages at the *right* time via the *right* route. Some of the features and capabilities of PANACEA include:

- ✓ Protocol timer, metronome, drug calculator
- ✓ Audible prompts to complete tasks within each protocol
- ✓ Records exact timing of administered protocols
- ✓ Audio documentation of all actions
- ✓ After action reporting
- ✓ Creates an electronic patient “chart” that seamlessly ports from one device to another or exports to a new medical record system
- ✓ Automatically updates when policies, procedures, protocols or dosages change

The Medical Director Suite enables a medical director to create and modify all the protocols EMS personnel follow. When policies, procedures, protocols or dosages change, PANACEA ensures that information dissemination is **accurate, immediate and verifiable.**
